EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter Maki on June 1, 2011.

The application has been amended as follows:

Claims 53, 54, 57 and 64 have been canceled.

Claim 55, the term "pre-determined location" has been changed to --opening--.

2. Claim 10 is allowable. Claims 55, 56 and 58-63, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement among inventions I-XIX, as set forth in the Office action mailed on 07/27/2006, is hereby withdrawn** and claims 55, 56 and 58-63 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. The following is an examiner's statement of reasons for allowance: claims 10 and 65 are allowable for setting forth a method of forming an electrode layer for a flat capacitor comprising the step of providing a lubricant dam to a die having a die hole, wherein the lubricant dam has a ridge and a lubricant reservoir behind the ridge, wherein the ridge does not extend around entire periphery of the die hole that the ridge has an opening to a protrusion extending into an interior of the die hole.

For example, Lyon teaches providing a die assembly having a lubricant dam 37. However, Lyon does not teach the method of forming an electrode layer for a flat capacitor and a protrusion extending into an interior of a die hole.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHONG NGUYEN whose telephone number is (571)272-4510. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on 571-272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
